Q1. PROPOSAL DESCRIPTION

Provide a brief abstract of the Proposal. Please note if the Proposal will facilitate or support the participation of DAC's in the IRWM planning effort.

The Upper Pit River Watershed Integrated Regional Water Management Plan (Upper Pit IRWMP) will be prepared over an 18-month period. The Upper Pit IRWMP's regional water management group (RWMG) will have primary responsibility for developing plan content. A coordinating committee will be responsible for managing the day-to-day activities of the RWMG members and the project consultant. It is anticipated that a variety of subcommittees and technical advisory committees will be formed to support creation of individual IRWMP chapters. The work plan consists of 17 tasks that, in the aggregate, will result in the preparation, and RWMG adoption, of an IRWMP that is fully consistent with the applicable guidelines and highly responsive to the needs of the region. Key components of the work plan include development of a chapter devoted to the identification and ongoing resolution of water-related issues and conflicts, convening of a region-wide local water and land-use planning conference, a model-based evaluation of the region's climate change vulnerabilities, and a detailed project development and integration process. Census data shows that 93 percent of the communities in the Upper Pit region meet the criteria of disadvantaged communities (80 percent of the statewide MHI). Of those, more than 40 percent meet the criteria for severely disadvantaged communities (60 percent of the statewide MHI). With these statistics in mind, a strategy for ensuring involvement by constituents in these communities has been developed. Meetings will be conducted within local communities, rather than at a single central location, which would require two to three hours of travel. A stipend fund will be created to enable participation. The communication strategy for IRWMP activities combines local media, electronic distribution via the Internet, hardcopy mailings, and materials distributed through local libraries to ensure that the maximum number of citizens and constituencies are informed of the plan development and have a variety of venues through which they can participate. The scope of work for plan development was created by the Planning Grant Proposal Development Committee, which was established by the RWMG. This group evaluated each plan standard and developed a work plan that directly addresses the needs and unique attributes of the Upper Pit region, particularly the significant percentage of DACs in the region while remaining consistent with the plan standards and guidelines.
